1. All pending claims 1-9 are allowed. Claim 1 is independent.

Claims 1, 3 and 8 have been amended to overcome the objection of claims 1, 3 and 8 and thus dependent claims 2, 4-7 and 9 set forth in the previous Office Action dated February 9, 2006.

2. The following is an examiner's statement of reasons for allowance:

The reasons for allowance for claims 1-9 given in the previous Office Action are still valid after the updated search. The reasons are repeated below.

Claim 1 and its dependent claims 2-9 are allowable over the prior art of record because the prior art, including the closest prior art Buchar et al. (U.S. Patent No. 4,967,233) discussed below, does not teach a scanner comprising a controller for controlling a driving device that drives a scanning module back to the home position of the scanning module after the scanning module has scanned a document placed on a transparent platform, such that when the scanning module stops at the home position the controller control the driving device to drive the scanning module to a maintenance position, which is different from the home position, and then controls the driving device to stop driving the module so that the module remains in the maintenance position.

The closest prior art reference Buchar et al. (U.S. Patent No. 4,967,233), cited in the previous Office Action, discloses a scanner having a controller for controlling a scanning module driving device to drive a scanning module to rotatably move to a

service position different from an image reading position to allow access to the sensors in the module from a position exterior to the scanner without disassembly of the scanning module from the scanner. Buchar et al. does not disclose a controller as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cheukfan Lee whose telephone number is (571) 272-7407. The examiner can normally be reached on 9:30 a.m. to 6:00 p.m., Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward L. Coles can be reached on (571) 272-7402. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
